A Note on this Handbook

This handbook applies to all students taking the B.Sc. (Early Childhood Education). It provides a guide to what is expected of you on this programme, and the academic and personal support available to you. Please retain for future reference.

The information provided in this handbook is accurate at time of preparation. Any necessary revisions will be notified to students via Moodle and/or email.

Introduction to Marino Institute of Education

Guiding Principles

Marino Institute of Education is a centre for teaching, learning and research in education under the co-trusteeship of the Irish Christian Brothers and Trinity College Dublin. The work of the Institute is under pinned by seven guiding principles. They are to:

- Be ecumenical and respectful of people of other faiths.
- Provide a strong element of teacher education.
- Be supportive of the mission of Catholic education by assisting the processes to articulate the ethos of Catholic education and by proposing models to implement it.
- Provide education programmes to encourage and empower the disadvantaged and the poor.
- Build a community of learning which is person-centred, respectful of differences and accessible to people who are disadvantaged.
- Assist parents to fulfil the responsibilities of their role as educators.
- Respect all truth seekers and defend their right to pursue new knowledge wherever it may lead.

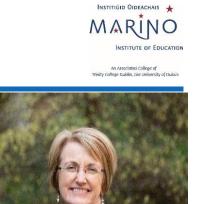

General Information about Marino Institute of Education

Marino Institute of Education (MIE) is a teaching, learning and research community committed to promoting inclusion in education. We have a long and proud involvement with education, specifically initial teacher education (ITE).

Our association with Trinity College Dublin began in 1976, when the first intake of lay students registered for the Bachelor in Education (B.Ed.) course. In July 2011, this relationship was further strengthened with the formalisation of an agreement, which places MIE under the joint trusteeship of the Congregation of Christian Brothers Province and Trinity College Dublin, the University of Dublin.

In the last decade, the academic mission and scope of MIE's activity has been re-envisioned to encompass a deeper understanding of education in and beyond the classroom, to incorporate the continuum of teacher education and the education of specialist education practitioners at early years, primary and further education levels. This is allied with a commitment to education studies encompassing non-traditional education settings and the wider education environment in a pluralist context.

Message from the President of Marino Institute of Education

A Mhac léinn, a chara,

On behalf of my colleagues I extend a warm welcome to you to

Marino Institute of Education (MIE). I am very pleased that you have elected to continue your studies at MIE. Tá súil agam go mbainfidh tú taitneamh agus tairbhe as an am a bheas tú anseo linn.

As a student within MIE you are part of a vibrant and innovative community which continues to design and develop new courses. We now have more than 1300 students registered on our courses, which include:

Undergraduate Programmes:

- Bachelor in Science (Early Childhood Education).
- Bachelor in Education (Primary Teaching).
- Bachelor in Science (Education Studies).
- Baitsiléir san Oideachas Trí Mheán na Gaeilge (Bunmhúinteoireacht).
- Trinity International Foundation Programme.

Postgraduate Programmes

- Master in Education Studies (Primary Mathematics Education).
- Master in Education Studies (Intercultural Learning and Leadership).
- Master in Education Studies (Early Childhood Education).
- Master in Education Studies (Inquiry-Based Learning).
- Master in Education Studies (Visual Arts).
- Master in Education Studies (Christian School Leadership).
- Professional Master of Education (Primary).
- Professional Diploma in Education (Further Education).

We are committed to educating leaders for the 21st century who share a professional belief in and moral commitment to, working towards excellence, equity, diversity and social justice within educational settings and communities at home and abroad. As a teaching institution, we have always prioritised education and its associated values. The recent pandemic re-inforced for us all the importance of the physical space of schooling, personal interaction and ultimately it has taught us the value of educational relationships where students and staff form a binding community albeit real or virtual, where empathy, communication and connectivity enable friendships to grow and students to flourish. We also renewed the importance of actively engaging with our peers, friends, families and communities in the arts, sports, social activities and all of the aspects of life that enrich us holistically. In this context, I congratulate you for selecting to undertake your studies at Marino Institute of Education. Our core values of care, community, and commitment to excellence will ensure that you will be in face-to-face lectures and on campus as often as possible so that you and your fellow classmates will be in a position to not just to learn together but to actively collaborate and connect with staff and other students. Rest assured that we also have the technological expertise and 'know-how' to pivot to online learning should another world event demand it so that you can continue your studies seamlessly and that we care constantly striving to enhance the digital services that we provide. Whilst Marino Institute of Education's roots are steeped in history, our ambition is to prepare our students for whatever changes and challenges the future holds.

We also hope that you enjoy the many amenities that our beautiful campus has to offer. Situated on a parkland site close to the city centre with expansive grounds and several playing fields, MIE has several computer labs, a specifically designed early childhood education room, a designated art room, a modern library, a sports hall and gym, an excellent canteen and a Costa Coffee outlet to cater for all tastes.

Our lecturers are very approachable and are dedicated to providing you with a top quality educational experience. Please engage with them and with your fellow students to enrich your own learning and to broaden your understanding of the educational journey you are about to embark on. Our counselling and chaplaincy services are also on hand to assist you through some of the unique personal challenges that you may encounter on your learning path.

We are with you every step of the way.

Ní neart go cur le chéile

Teresa O'Doherty

Professor Teresa O'Doherty

President

Message from your Programme Leader

A chara,

On behalf of the Department of Arts, Maths, PE and Early Childhood Education, I extend a warm welcome to you on the Bachelor of Science in Early Childhood Education in Marino Institute of Education (MIE). We are delighted and proud that you have chosen to pursue your studies at MIE

and look forward to getting to know you over the next four years.

As a student in early childhood education, you are part of an exciting and creative department together with arts, maths and PE with many opportunities for innovative approaches to teaching and learning. As a student in this department, you are now also part of a dynamic student cohort in ECE numbering almost 300 students. This speaks to the growing acknowledgement and status of early childhood education and the rapidly expanding ECE sector.

As a leader in third level delivery of early childhood education programmes, we deliver an education programme that nurtures highly skilled early childhood educators who can design and facilitate high quality, inclusive and values based early childhood education to young children across different settings and educational contexts. In 2019, a new validation process became a requirement for early childhood education qualifications. MIE was the first Level 8 degree in early childhood education to be validated and was one of the only fully validated Level 8 programmes to commence in 2020. This speaks to the high quality of education in MIE and to our dedication to educate the best qualified early childhood educators in the sector.

Learning in the early years is about joy, connection and discovery. We hope that your own learning journey in the BSc in Early Childhood Education mirrors this. It should also spark your own curiosity and imagination. You should develop a comprehensive understanding of pedagogy, learning and children's development, ultimately preparing you fully to work with and change the lives of young children. The field of early childhood education is dynamic and changing. This is both an exciting and challenging time for educators. Early childhood education requires leaders of young children's learning. Through engaging in a range of modules that focus on theory, research and practice, it is our intention that your studies this year bring you one step closer to developing the competencies that support you to realise your potential as an early childhood educator.

The B.Sc in Early Childhood in MIE places great value on the role that Field Placement plays in the development of our students as highly skilled and effective practitioners. Over your four years here as a student of Early Childhood Education, you will have ample opportunities to apply the knowledge and the skills that you acquire in your lectures to a range of Early Childhood Education contexts. These include crèches, pre-schools, Montessori, Early Start Units and ASD pre-school classes. You will receive quality mentorship and supervision from experienced early childhood educators throughout your four years, who will endeavour to help you to develop a vision of yourself as an outstanding Early Childhood Educator.

Dr. Maja Haals Brosnan,

Programme Leader in BSc Early Childhood Education

On behalf of the early childhood education team

Dr. Natasha O'Donnell

Programme Overview

Programme Aims

The programme aims of the B.Sc. (Early Childhood Education) include:

- 1. To provide a broad practical and theoretical understanding of the holistic development of young children in a variety of contexts.
- 2. To enhance practice through the exploration of the role of Early Childhood practitioners across domains of learning.
- 3. To afford opportunities to analyse, critique and debate Early Childhood policy and practice in Irish and international contexts.
- 4. To deepen understanding of the ethical complexities and considerations that lead to high quality practice in Early Childhood settings.
- To offer opportunities to critically reflect on the relationship between theory and practice through conducting rigorous research that adds to the body of knowledge in the field.
- To enable students to develop personally and to be prepared for careers in Early Childhood settings.

Programme Learning Outcomes

This programme leads to the award of a degree at Level 8 of the National Qualifications Authority of Ireland. The degree is awarded by Trinity College, the University of Dublin. The overarching themes which underpin the programme aims and programme learning outcomes include The Child, Curriculum and Policy, Ethics and Social Justice and the Professional (self).

Upon successful completion of the B.Sc. (Early Childhood Education) Programme, students should be able to:

- 1. Articulate a critical understanding of child psychology and development in context.
- 2. Theorise, plan, develop, enact and assess curriculum appropriate to the Early Years context.
- 3. Compare and critique Early Years educational policies and practices in Ireland with those in other societies, and appraise the benefits and limitations of educational policy alternatives in an ever-changing global context.

Page **17** of **94**

- 4. Identify and interpret the complex and inter-related factors that influence teaching and learning in different environments and identify factors that influence these relationships.
- 5. Identify and discuss the key factors related to a child's physical, social and emotional interactions and wellbeing in the Early Years.
- Articulate an understanding of the centrality of artistic exploration in Early Years education and the value of the social, emotional and aesthetic dimensions in Early Childhood development.
- Identify and explain the importance of and the need for high ethical standards in the practice of Early Years education, including the moral responsibilities of the education profession to diminish intolerance, discrimination and educational disadvantage.
- 8. Critically analyse and discuss theories of language acquisition and apply them in practical settings to enhance the language development of young children.
- 9. Undertake a substantial piece of academic research and present findings in written format in an appropriate scholarly manner, to a specialist or non-specialist audience as appropriate.
- 10. Articulate an in-depth knowledge of an elected field of study.
- 11. Critically reflect on field placement experiences and use these reflections to inform future practice and identify areas of focus for future professional development.

Programme Delivery

The course will be delivered on the MIE campus over four academic years. The total credit weighting for the course is 240 ECTS credits. The course will be delivered face-to-face.

Online material will be facilitated through Moodle, a virtual learning environment (VLE) used to support teaching and learning on this course. This VLE will contain all course materials and will be used to keep participants informed and involved with all aspects of the course. It will also contain supplementary lecture material, which is additional to the face-to-face contact. Moodle will be used as the forum for asynchronous and synchronous discussion and engagement.

Description of the European Credit Transfer System (ECTS)

ECTS stands for European Credit Transfer and Accumulation System. It is a way of comparing and accrediting undergraduate & postgraduate modules and programmes across the European Union and other collaborating countries. The ECTS weighting for a module is an estimate of the student workload required for that module, based on factors such as the number of contact hours, the number and length of written or verbally presented assessment exercises, class preparation and private study time, laboratory classes, examinations, field placements, and so on as appropriate. There is no intrinsic relationship between the credit volume of a module and its level of difficulty.

In TCD 1 ECTS unit is defined as 20-25 hours of student input; so a 5-credit module typically requires 100-125 hours of student input, including class contact time and assessments. A 10-credit module will require 200-250 hours of student input. The European norm for full-time study over one academic year is 60 credits. Students who successfully complete the B.Sc. ECE will have earned 240 credits.

ECTS credits are awarded to a student only upon successful completion of the course year. Progression from one year to the next is determined by the course regulations. Students who fail a year of their course will not obtain credit for that year even if they have passed some component courses.

Erasmus+ Mobility/International Mobility

Students on the B.Sc. in Early Childhood Education course can undertake Erasmus+ mobility in second, third of fourth year. Other mobility funding options are also available through the Swiss SEMP programme where students can avail of funding to study in Zurich. If you are interested in undertaking a semester abroad please contact <u>erasmus@mie.ie</u> for further details.

Field Placement¹

The Field Placement module in each year allows students to experience the practical application of the theory they are learning in college. It also provides a meaningful and realistic insight into the world of early years' education. Group reflection and a collaborative sharing of experience enhances the learning for all.

In years 1, 2 and 3, placement consists of a three-week block placement. In Year 4, the Field Placement involves a nine-week block, including an observation week. Over the four years, students will engage in approximately 600 hours of field placement. Students are assessed in the areas of planning and practice by an assigned Field Placement tutor across all year groups. In year 2, students are provided with an opportunity to take an additional week placement in a Special Educational setting. In year 3, students are provided with a further opportunity to complete an additional placement week in an alternative early childhood setting. These are not an assessed placements but students will be provided with mentoring throughout, as well as an opportunity to reflect on their placement in small group settings.

Child Safeguarding

The safeguarding of children and vulnerable persons is a priority for MIE. All staff and students required to adhere to the Institute's safeguarding policies which are available on the MIE website. All staff and students are required to be Garda Vetted and complete the TUSLA Safeguarding e-learning programme. No student or staff member will be permitted to work with children or vulnerable persons either on campus (e.g. research/ outreach projects) or off campus (e.g. placement) unless they have completed both their Garda Vetting and safeguarding training.

Any queries related to safeguarding can be directed to the Designated Liaison Person, Dr Julie Uí Choistealbha at Julie.uichoistealbha@mie.ie

The Child Safeguarding Policy can be accessed here

The Vulnerable Persons Safeguarding Policy can be access here

¹ Students will receive a separate Field Placement Handbook with more in-depth information relating to the placement component of the programme.

Garda Vetting

Prior to participating in any component of placement, students are required to have successfully completed the Garda Vetting process. A student's failure to complete Garda Vetting, either by not returning vetting application forms on time of by not completing the online part of the process, may impact a student's ability to undertake placement. This in turn may result in a failing grade for placement. It is the student's responsibility to ensure that they have been successfully vetted and to respond to any communication sent by the Registrar's Office or Placement Office in relation to vetting and to contact the relevant office (e.g. Registrar's Office) if a delay occurs or a query arises in completing the vetting process.

Year	Total Hours	Structure	Setting	Application
ECE1	114	3-week block	Early Years	Application facilitated by MIE
ECE2	114	3-week block 1-week Sp. Ed block	Early Years	Student applies independently but with support from MIE
ECE3	114	3-week block 1 week Altn. block	Early Years	Student applies independently
ECE4	270	1-week observation block 8-week block	Early Years (Students may choose to revisit a setting from previous years)	Student applies independently

Structure of Field Placement

The student will organise their own field placement in accordance with the directions provided by the Institute. It is expected that the students will engage fully with the field placement and will demonstrate an enthusiasm for learning about the work of the provider over the duration of the placement. The student will be professional at all times, in terms of conduct, dress and manner.

Students will maintain confidentiality and discretion at all times. The field placement is not to be discussed online, through social media or any other public forum. The student will be punctual and attend for all days of the field placement. Missed days will have to be compensated for, in consultation with the Programme Coordinator. In the event of a student not being able to attend the following procedure must be adhered to:

- The student will contact their field placement provider.
- The student will contact their placement mentor.
- The student will contact the Institute.

Marino Institute of Education recognises the key role of early years' services in offering places to students for field placement. When a student commits to attending a service for a particular placement, inconvenience is caused to the service if a student is absent for any of placement time. Therefore, when a student commences any field placement, full and complete attendance is required. No exceptions to this are possible without written permission from the Director of Field Placement being given before the commencement of the placement. Should it happen that a student has a contagious illness or is too ill to attend placement, notification must be provided to the host provider, the placement tutor and the Placement Office in the Institute the evening before or in exceptional circumstances before 8 a.m. on the morning of the absence. Such an absence is only acceptable if it has been approved by a medical doctor. When a student is absent, a medical certificate must be provided to the lnstitute within one week of the absence. Medically certified absences will be made up at the appropriate time.

While on placement the student will:

- Engage in observation of the work of the placement provider.
- Participate in the daily activities of the placement provider.
- Carry out required tasks as outlined in lectures/assignments.

• Reflect on the work of the placement provider through the use of prescribed reflection questions as provided by the Institute.

The student will agree a work plan for the placement prior to the commencement of the placement. A copy of this must be presented to the placement mentor and the placement provider. The student will provide contact details of the placement provider for their placement tutor, including map, phone and email. The student will liaise with the placement tutor and placement provider to organise a time suitable for the placement mentor to visit and/or contact the field placement provider. Students who do not keep field placement deadlines or return field placement forms and their completed field placement portfolios in full and by the assigned deadlines may not be given permission to complete their Field Placement that year. Placements will then have to be completed the following year and students will have to go 'off-books' to complete their placement module. Specific guidelines relating to the assessment procedures to be adhered to in year 3 and 4 will be given during lectures, are available on Moodle and can be found in the Year 4 module descriptors.

Dress Code

The B.Sc. in Early Childhood Education is practicum degree, which means it is a practical course where students, in addition to theoretical knowledge, engage in hands on, practical work. When on campus and on professional practice (field) placement, students must be dressed and prepared to engage in outdoor learning experiences in any weather conditions and engage with a range of play-based learning materials, such as playdough, which require good hand hygiene practices. For practical reasons, long jewellery and long nails present injury and hygiene risks to both students and children in their care and therefore both should be avoided when on placement in early childhood education settings and when engaging in practical modules on campus.

Module Information

B.Sc. ECE 1 Semester 1

Module Name:	Field Placem	ent				
Module Code:	EC8109	ECTS: 5	Module Type:	Core		
		Module Descriptio	n			
This rationale for t	this Field Placer	nent module is to en	able students to pr	epare for, engage		
with and reflect o	n an Early Child	hood Education place	ement. It hopes to	enable students to		
contribute to the l	holistic develop	ment of young childr	en by supporting a	nd nurturing them		
using an open, pla	yful attitude w	hile also developing t	he students' own s	kills and aptitudes		
as early years' refl	ective and know	wledgeable practitior	iers.			
Students will have	an opportunity	y to identify personal	and professional g	oals and apply		
theory to practice	theory to practice. They will also develop their ability to provide a range of learning					
experiences that respond to children's interests and that support holistic development.						
Link to Moodle page:	Course: EC810	9: BECE1 Field Placer	nent (learnonline.ie	<u>e)</u>		

Module Name:	Literacies in the Early Years: Language Acquisition				
Module Code:	EC8106	ECTS: 5	Module Type	Core	
Module Description					
Language is the n	nost powerful to	ol in the developm	ent of any human b	peing. It is undeniably	
the greatest asset we possess. A good grasp of language is synonymous with a sound ability					
to think. In other words, language and thought are inseparable. Vygotsky (1986) asserts that					
language development aids cognitive development. A child who is adept linguistically is thus					

advantaged in starting off his/her school life.

This module will focus on developing an understanding of how language shapes thinking and how practice in settings can be adjusted to facilitate this. It will also explore the communication theme in depth so that early years practitioners can confidently implement

а	language-rich curriculum in their early childhood setting for children from birth to 6
y	rears.

Link to Moodle	EC81XX (learnonline.ie)
page:	

Module Name:	A nurturing pedagogy in early childhood education					
Module Code:	EC8108	ECTS: 5	Module Type	Core		
	Modu	le Descriptio	<u> </u> n			
This module is con	cerned with developing	g students' kn	nowledge, values a	nd skills that are		
core to cultivating	a nurturing pedagogy.	An emphasis	on real world appl	ication of practice		
and policy will be o	central to this module a	and students v	will be encouraged	to apply theory to		
practice including	practical skills, risk asse	essment and h	nygiene standards,	for the care of a		
baby and young ch	nild. This pedagogy hig	hlights the im	portance of initial	and continuing		
professional devel	opment for those work	ing in an early	y years setting. To	foreground the		
pedagogical impor	tance of interactions b	etween a pra	ctitioner and a bab	y / young child		
during care routine	es such as feeding, chai	nging, etc. his	module aims to eq	quip students with		
depth knowledge o	depth knowledge of how to ensure children in the early years receive appropriate hygiene					
and health standar	and health standards in early years' provision, while highlighting the fundamental					
mportance of quality interactions in supporting children's well-being.

Module Name:	Curriculum and Pedagogical Perspectives: Dispositions and Play				
Module Code:	EC8102	ECTS:10	Module Type	Core	
	I	Module Descripti	on		
Play is a key tool fo	or learning and c	hildren's way of m	ediating their und	erstanding of the	
world. Dispositions such as persistence, resilience, and concentration are fundamental					
characteristics that help children develop. This module will introduce students to theory					
and research as foundations of practice. The main focus is play: the purpose of play,					

different types of play, how to support play, plan for play, get involved in play, and how we can create meaningful learning and life experiences for children through play.

(learnonline.ie)

Module Name:	Psychology and the Developing Child				
Module Code:	EC8107	ECTS: 10	Module Type	Core	
Module Description					
This module will	provide a founda	ation for students to	understand the ba	asic methods and	
perspectives prov	vided by psychol	ogical thinking, and	how these may be	applied to early	
education and development from birth to 6 years. It will draw largely on developmental					
psychology in delineating various psychological schools of thought and how they describe					
the learning and development of young children in a holistic sense (physical, social,					

emotional, cognitive, moral, linguistic etc.). Students will be encouraged to begin a process of developing critical, analytical approaches to their work. Such approaches are applicable to the study of psychology, but are also transferable to other disciplines and subjects within the B.Sc.

page: Childhood Education (learnonline.ie)

Module Name:	Foundation ir	in Inclusive Education			
Module Code:	EC8104 ECTS:5 Module Type Core				
Module Description					
This introductory inclusion module familiarise students with a democratic approach to					
inclusive early childhood education, which considers the meaningful involvement and					
inclusion of children with different strengths, abilities and difficulties. While students will be					
introduced to the wide spectrum of different factors influencing children's inclusion in ECE,					

especially as set out in the Diversity, Equality and Inclusion Charter and Guidelines published by the Department for Children and Youth Affairs (DCYA, 2016) the module will especially focus on children with special educational needs. For children with special needs as for all children, early childhood should be a time of tremendous opportunity for development and learning. The nature of provision at this life stage will critically impact on the child's lifelong development. Quality provision for young children with special needs implies that any additional supports and interventions required are employed in an interrelated manner on the basis of the child's holistic development. To that end, this foundational module seeks primarily to develop in students, awareness and understanding of the various challenges to development and learning experienced by children and the implications arising from these for practitioners in the field of early childhood care and education. It seeks to enable students to develop perspectives, knowledge and initial skills appropriate to their role as members of a multi-disciplinary team working as a flexible, inclusive whole to support the development and learning of young children, especially those with special needs. A collaborative, partnership approach to working with parents will be emphasised with students who will also be expected to engage with professional values and attitudes surrounding inclusion. This will enable students to begin to consider a democratic, whole setting approach to inclusion.

Module Name:	Developing Movement Skills through Activity and Play					
Module Code:	EC8103	ECTS:5	Module Type	Core		
	Module Description					
This course is based on a broad philosophy of health that encompasses all aspects of a						
child's well-being, with a particular focus on physical health and movement through activity						
and play. It is concerned with developing students' knowledge and understanding, skills,						
values and attitudes that are central to a quality programme for children in the early years.						
Student early childhood educators will be encouraged to focus on the role they play as they						
promote the physical, social and emotional growth and development of children in the early						

years. This module aims to develop an understanding of the value of self and others and the development of positive interpersonal relationships

Through practical elements the students will recognise the central role and responsibilities of the early childhood practitioner when developing movement through activity and play in a safe environment. This module generates confidence in Managing and organising children and relevant equipment in movement and play activities, and provides opportunities to understand how to refine skills and to enhance hand-eye co-ordination by finding out what different body parts do and what sounds they make (e.g. stretching, balancing, listening to their breathing, throwing and catching items, kicking a ball, using a climbing frame).

Module Name:	Early Mathematical Awareness			
Module Code:	EC8202	ECTS:5	Module Type	Core
		credits		
		Module Descripti	on	
This module prep	ares those worki	ng with children in	the early years to	create formal and
informal opportu	nities to awaken	children's mathem	atical sensibility ar	nd curiosity
throughout the early years. Above all, it helps the early childhood educator to promote				
children's enjoyment and confidence in thinking, talking and playing mathematically. The				
following topics will be included: algebra and early mathematical activities, data, number,				
measures and shape and space. Connections with the Aistear framework will develop				
students understanding of the important role of language and play in the mathematical				
development of young children. Students will examine differentiation with regard to				
modifying approaches, methods, materials, resources and learning tasks according to				
individuals' cognitive development, needs and interests.				
Link to Moodle Course: EC8202: BECE2 Early Mathematical Awareness (learnonline.ie)				

Module Name:	Music Drama and Integrated Arts			
Module Code:	EC8212	ECTS:5	Module Type	Core
		Module Descript	ion	
Early engagemen	t with artistic and	l cultural experien	ces is a right for all	children. This
includes socio-dra	amatic play, dram	a, storytelling, the	eatre, musical comp	oosing, listening and
responding to mu	usic and performin	ng informs the cor	ntent of this module	e. It builds on the
Junior Freshman module, 'Awakening the Senses: Creativity and the Visual Arts. It will focus				
on integrated arts and pay special attention to Music (listening, responding, composing and				
performing), Dance, Drama, Storytelling and Theatre. This module examines that balance of				
child-structured and practitioner-structured play and drama which allows for playfulness,				
spontaneity, collaboration and creative problem-posing and exploration. It presents stories				
and theatre as ways of 'inviting engagement' (Bell, 2009) and bringing us into a special and				
personal connection with their content.

Link to Moodle	Course: BECE 2 Music, Drama and Integrated Arts (learnonline.ie)
page:	

Module Name:	Inclusion and Diversity in Early Childhood Education					
Module Code:	EC8208	ECTS:5	Module Type	Core		
Module Description						
This module is ur	nderpinned by th	e UN Declaration o	n the Rights of the	Child (articles 28 and		
29) which states that all children are entitled to equality of both access and opportunities to						
enjoy and to learn within a stimulating and safe care environment. The right to education is						
of vital importance in that it is fundamental to the full access to other rights and to the						
ability to participate fully in in the civil life of a society.						
Ireland is a deeply unequal society. CSO figures show that more than one in 5 children is at						
serious risk of poverty (200,000) and one in ten living in consistent poverty. This module						

promotes in students an understanding of the importance of early years "provision that

encourages participation, strengthens social inclusion and embraces divers	ity" (European
Commission, 2014, p. 9).

Module Name:	Curriculum and Peda	agogical Pe	rspectives: Mode	ls of Curriculum			
	and Assessment						
Module Code:	EC8204	ECTS: 10	Module Type	Core			
	Modu	le Descripti	on				
This module will lo	ook at a number of diffe	erent curricu	lum models and at	the contexts in			
which they are em	nbedded. The purpose is	s to familiar	ise students with na	ational and			
international mod	lels of curriculum. Havir	ng studied di	fferent curriculum	models, students			
should be enabled	to make informed dec	isions about	curriculum in the l	rish context. They			
should also be abl	e to critique a curriculu	m, such as A	sistear, and identify	its theoretical			
underpinnings fro	m accessing their know	ledge of cur	riculum theories an	d other curricula.			
Approaches to ass	sessment in the early ye	ears will be e	xamined here to er	nsure that students			
will be able to ide	ntify appropriate assess	sment practi	ce for working with	children from birth			
to 6 years.	to 6 years.						
Students will develop an understanding and be able to articulate the difference between							
curriculum and cu	rriculum frameworks a	nd the atten	dant implications o	f that difference for			
their practice. This	their practice. This module allows students to become familiar with and be able to critique						
curricula offered in Ireland and in international contexts and appreciate the connection							
between curriculu	between curriculum, curriculum frameworks and curriculum theories with their practice in						
early childhood education settings.							
Link to Moodle page:							

Module Name:	Field Placem	ent			
Module Code:	EC8210	ECTS:	5 credits	Module Type:	Core

Module Description

This rationale for this Field Placement module is to enable students to prepare for, engage with and reflect on their second Early Childhood Education placement. It hopes to build on student's field placement experiences from 1st year and to enable them to develop more refined skills of purposeful observation and evaluation. The content for this module hopes to make observation practical, useful and meaningful so that students will be enabled to employ a range of observation methods to inform their planning and practice in early years settings. This module also hopes to equip students with the knowledge and understanding of a range of curriculum models that they will be able to draw upon for the planning of purposeful, adult-led activities.

B.Sc. ECE 2 Semester 2

Module Name:	Early Child	dhood Edu	cation Polic	y and Practice ir	n Ireland
Module Code:	EC8205	ECTS:	5 credits	Module Type:	Core
		Mod	ule Descripti	on	
National policies	in early child	lhood educ	ation and car	e have seen the ir	ntroduction of
funding and regu	lation aimed	at expandi	ng access, er	suring quality, and	d improving
programme cohe	sion. These	initiatives	continue to s	hape the growth o	of private and public
service provision	in an increas	singly multi	cultural Irela	nd. Access initiati	ves highlight critical
factors in early childhood education such as training and other "active ingredients" that					
contribute to imp	roved outco	mes for chi	ildren. Evide	nce based practice	es to support quality
assurance in early	/ childhood e	education a	nd care servi	ces have been op	erationalised by a
number of region	al stakehold	ers. Natio	nal research	has also supporte	d the emergence of
an increasing range of family support services for children from 0 to 3 years. Policies to					
unify the work of early childhood education and care professionals from a range of					
backgrounds are designed to facilitate efficiencies, foster quality for all children in Ireland					
from 0 to 6 years of age, and prevent potential difficulties associated with transition in early					

childhood. Students will be facilitated in integrating their learning in this module with that in the Understanding Childhood in Context module.

page:	(learnonline.ie)					

Module Name:	Well-being and Health Education in ECE					
Module Code:	EC8206	ECTS: 5 credits	Module Type	Core		
		Module Descript	tion			
This course is based on a broad philosophy of well-being that encompasses physical, social,						
mental, and spiritual health. How well-being is conceptualised and the factors that impact						
upon child health and well-being are considered. This module is concerned with developing						
students' knowledge and understanding, skills, values and attitudes that are central to						
supporting child	supporting children's health and well-being in the early years setting.					

On successful completion of this module, students should be able to:

• State the rationale for, and the nature and value of emphasising a child's well-being and health in the early years

• Review conceptual and theoretical understandings of child well-being and health

•	Summarise the domains of development from 0 – 6 years to include physical and
	motor development, both typical and atypical

- Summarise theoretical perspectives and research based on early childhood health and well-being
- Plan, assess, implement and evaluate procedures and experiences related to health and well-being for children from birth to 6 years with a diverse range of needs and abilities
- Identify and use participative (active learning) methodologies and procedures which are central to the organisation and management of health and well-being within the early childhood setting
- Use appropriate health and safety strategies in health and well-being, underpinned by research, policy and guidelines
- Articulate how Aistear, the Irish curriculum framework for children aged 0-6, and Síolta (the National Quality Framework for Early Childhood Education) can be used as a planning and practice resource for working in an early years' setting

page:	<u>(learnonline.ie)</u>

Module Name:	Special Education Needs in Early Childhood Education					
Module Code:	EC8211	ECTS:5	Module Type	Core		
Module Description						
The early years a	re a time of part	icular importance ir	n children's develop	oment, learning and		
growth. Children	with special edu	cational needs (SEN	I), as for all childre	n, benefit from		
quality inclusive l	earning environ	ments that offer op	portunities for dev	elopment. Early		
years practitioners and educators occupy a central role in supporting children with SEN						
during this important period. Understanding of SEN is paramount and informs knowledge of						
how early years settings plan and support play, learning and development situated in an						
inclusive approach. This module offers theoretical and practical knowledge and encourages						

students to develop perspectives, knowledge and skills to inform an inclusive and holistic approach to practice. On completion of this module, students should have a good understanding of how additional needs may affect learning and development and how best to support them. Adapting strategies, materials and activities so all children have access to the same learning opportunities will be examined. Students will consider implications for practice to include planning and providing for the individual needs of children with SEN.

B.Sc. ECE 3 Semester 1

Module Name:	Inquiry-based learning and environmental care					
Module Code:	EC8207	ECTS: 5	Module Type	Core		
	ſ	Module Descripti	on	I		
Inquiry-Based Lea	rning [IBL] as a the	me of education	al research has att	racted considerable		
interest particular	ly in recent years.	It currently influ	ences curriculum c	levelopment and		
teaching approacl	hes and methodolo	ogies in a number	of recent innovati	ive programmes to		
construct new mo	dels of teaching ar	nd learning. This l	nas led to research	and development		
of inquiry-based c	curricula and the ar	gument in suppo	rt of inquiry-based	l learning is being		
heard increasingly	and recognised as	s an appropriate	pedagogical appro	ach.		
The course will in	vestigate how Inqu	irv-Based Learnir	ng can be used as a	a way to explore and		
	rstanding of the wo	•	-			
	U			nts the opportunity		
	·			, environmental and		
	his area of study w					
concepts and how these are critical in the development of young children to deepen their						
understanding of the world around them. The course will focus on practical experiences and						
investigations that will provide the necessary skills and pedagogical understandings that						
Early Childhood practitioners need in order to explore some of these concepts successfully						
in various settings.						

This module will strengthen students' capacity to promote and critique children's inquiry in an Early Childhood setting. They will have requisite knowledge, skills and capacities for reflection necessary to develop positive engagement with Inquiry-Based Learning.

Module Name:	Early Literacie	25			
Module Code:	EC8307	ECTS: 5	Module Type	Core	
		Module Descript	tion		
"Those who work with very young children have a unique opportunity to get it right from					
the start and to e	the start and to enhance children's literacy though rich learning opportunities". (French,				

2013)

Literacy is not confined to printed ink on a page, therefore it is imperative that those working with our youngest learners afford consistent, language-rich, playful opportunities for young children to develop their emergent literacy skills. This module explores what 'getting it right' in early literacy resembles through the chosen early literacy practices of the contemporary early childhood educator.

Content has been designed to afford students with the opportunity to develop an in depth awareness and appreciation of the interconnected intricacies of early literacy development and the fundamental role of the contemporary early childhood educator in nurturing young children's emerging literacy skills. Course content has been organised to equip students with relevant literacy knowledge and practical skill development to enable the facilitation of effective and developmentally appropriate early literacy learning experiences in ECE across their upcoming field placements and future professional practice. Across this module, students will explore the role of the early childhood educator in developing children's oral language, phonological awareness, emergent reading and emergent writing. Students will be enabled to develop an awareness of key strategies and approaches to best support effective shared-reading practices, playful emergent literacy learning and opportunities to capitalise on the use of children's literature to foster emergent literacy in the early years.

Module Name:	Legal Context of Early Childhood Education					
Module Code:	EC8303	ECTS:5	Module Type	Core		
		Module Descripti	on			
This module build	s on the introdu	uction to the practica	al implications of le	egislation, statutory		
regulations and gu	uidelines which	are related directly	to or impact on ea	rly childhood		
education settings	provided by th	ne JF Module "A Nur	turing Pedagogy".	In this module, the		
evolution and context of legislation will be considered against the backdrop of a changing						
socio-historical landscape. Children's rights will form a thread running through this module						
as we begin with the UNCRC tracking how 'children's rights' has influenced the enactment						
and content of key legislative provision. Students will be encouraged to adopt a critical lens						

when considering key legislation, regulations and guidelines related to child care. In examining legislation in early childhood education we will also consider how legislation impacts on childcare settings such as, for example, the relationship between regulations (particularly regulation 5) and Síolta.

On successful completion of this module, students should be able to critically discuss the main statutory provisions relating to early childhood settings and analyse major decisions in Irish case-law that have influenced practice in early childhood settings. Furthermore, this module develops students' ability to evaluate the law on safety, health and welfare at work as it relates to early childhood settings and assess the duty of care expected of early childhood personnel. This module explores the responsibilities of management personnel in contemporary early childhood settings.

relevant stakehold	lers i.e. the st	udents, t	he educationa:	l institution and th	e employers. It can	
be an excellent me	ethod of prov	iding opp	oortunities for	extending the lear	ning (theoretical)	
commenced by stu	udents at the	educatio	nal institution	into the learning e	environment of the	
workplace. This is	workplace. This is particularly relevant to the early childhood education sector (DES, 2016;					
PLÉ, 2018; Urban et al, 2012).						
Consequently, students must demonstrate their understanding of the culture of the early						
childhood education sector, the norms of early years practice and how their skills and						
competencies will	enable them	to be inr	novators and ef	ffective team mem	bers. These	

include both the hard skills or technical competencies and the soft skills such as the application of theory to practice (Dunn et al., 2012).

This module focuses on support students to develop an awareness of their role as leaders of children's learning through giving consideration and meaning to reflective practice; links between knowledge, practice and one's own values; considering the systems context and considering the organisational cultures in ECE workplaces in the context of the need for change and quality and competency development (Bruner, 1996; Urban et al, 2012).

Module Name:	Curriculum a	Curriculum and Pedagogical Perspectives: Learning through Play					
	1						
Module Code:	EC8004	ECTS:5	Module Type	Core			
		Module Descript	ion				
This module build	ds on the module	e in the first year (JF	⁻) of the programm	e called Curriculum			
and Pedagogical	Perspectives: Dis	positions and Play.	Students, now in t	heir fourth year of			
the programme (SS) and having h	ad the benefit of th	ree years of acade	mic work and			
practical experie	nce in the field, a	ire ideally placed to	interrogate ideas a	and theories around			
best practice of playful pedagogy.							
It is important that early years' graduates are equipped to confidently articulate and							
defend a researc	h-led, play-based	l approach to learn	ing in the early yea	rs and additionally to			
mediate and support child-led and adult-supported playful learning through an emergent							

curriculum.

On successful completion of this module, students should be able to

- Articulate and defend a research-based approach to working playfully with children in an early years' context
- Outline an agile and responsive approach to children's emergent playful learning needs (PLO2)

- Describe the particular play needs of 1-3-year-old children, including children with additional learning needs (PLO 2).
- Use Aistear, the Irish curriculum framework for children aged 0-6, as a planning and practice resource for working in an early years' setting (PLO2)
- Adapt play activities to facilitate children with additional needs (PLO2, PLO4, PLO5, PLO7, PLO11)
- Apply theoretical ideas to analyse play-based practice
- Analyse their experience of playful learning on previous placement and propose adjustments for improved future placement practice.

Module Name:	Research Methods and Dissertation					
Module Code:	EC8405	ECTS: 20	Module Type	Core		
	Modu	le Descriptio	n in			
This module is des	igned to provide a com	prehensive e	laboration of resea	arch methodologies		
introduced in Year	3, in order to prepare	students for	the completion of a	a research		
dissertation. Quan	titative, Qualitative and	d Mixed Metl	nod approaches wi	ll be		
explored. Central	to this module will be t	he applicatio	n of these research	n paradigms to the		
final year mandato	ory research project, wh	hich all stude	nts will undertake.	Students will be		
further supported	in other key elements	also introduc	ed in Year 3 require	ed for the		
successful prepara	tion of the dissertation	including etl	hics in research, re	viewing literature		
and academic writ	and academic writing. The topic of the dissertation must link to and build on an aspect of					
the coursework completed so far, i.e. core modules, specialisation module, work						
placement.

Module Name:	Curricul	um and Pe	dagogical P	erspectives: Lear	ning through Play
	2				
	2				
Module Code:	EC8905		ECTS:5	Module Type	Core
		Mod	ule Descripti	on	
This module on pla	ay follows C		-	cal Perspectives: L	earning through
외ay 1 from term 1	in year 4. I	In the first t	term students	s focused on becor	ning a player

themselves and there was an emphasis on play with children from 1-3 years old. The theoretical focus was on the tension between freedom and structure in play. This experience, combined with their first year module on play, prepares students for this final module which moves their focus outwards to supporting parents, looking at technology and play and it also sets students up to use Síolta's standards to consider the quality of the play environment for children.

Early years' graduates need to be equipped with the knowledge and skills to enter into dialogue with parents about their children's learning and to be able to provide guidance as necessary. They also need to be able to articulate research- informed and balanced views on the role of technology in the lives of young children. Finally, graduates should have a clear understanding on what comprises a good quality learning environment for young children.

On successful completion of this module, students should be able to

- Articulate and defend a research-based approach to working dialogically and reciprocally with children in an early years' context
- Anticipate and describe an appropriately agile and responsive approach to children's emergent playful learning needs
- Critique research on the role of technology in children's lives and outline how technology might be appropriately used in playful learning.
- Evaluate how Síolta, the Irish quality framework for children aged 0-6, could be used as a resource for working in quality early years' environments

page:	

Module Name:	Field Pla	cement			
Module Code:	EC8410	ECTS:	20 credits	Module Type:	Core
		Мо	dule Description	on	I
This module equips a student to apply and progress their professional knowledge, competencies and skills in an early educational setting and is a continuation of the work					

completed by students in the Organisation Learning and Skills in Early Childhood module. The seminal study "Competence Requirements in Early Childhood Education and Care" (CoRe, Urban et al., 2011) suggests '...becoming 'competent' is a continuous process that comprises the capability and ability to build on a body of professional knowledge, practice and develop and show professional values. Although it is important to have a 'body of knowledge' and 'practice', practitioners and teams also need reflective competences as they work in highly complex, unpredictable and diverse contexts (p.21). Vanderbroeck et al., (2011) maintain that the continuing development and application of core competencies and skills combined with the knowledge and understanding to integrate education and care are fundamental to quality early years' provision. The benefits of practicum experience according to Bonnett (2015, p.197) gives students an opportunity 'to engage in a theory-topractice model as they work directly with children, families, agency mentors and community partners'.

Grounded within this understanding, students will undertake their placements within settings which will introduce them to the applied, concrete competencies necessary, while at the same time, affording them an opportunity to network and interface with established professionals in the field of early childhood education. It is intended that students will be encouraged to apply the theoretical concepts and skills acquired during lectures and workshops over the course of their placement. At all times, students will be supported in playing an active and productive part on the team in their placement setting.

Students will be encouraged to become "reflective practitioners" during the placement.

Reflective Practice is recognised as core to improving practice and to ensure better outcomes for the children in services. Schonfeld (2015, p.7) relays that it is '...a process by which you stop and think about your practice, consciously analyse your decision making and draw on theory and relate it to what you do in practice." This module not only encourages a reflective practice approach but one embedded in critical analysis and evaluation.

B.Sc. ECE Electives

Module Name:	Nutrition a	Nutrition and Healthy Eating				
Module Code:	EC8901	ECTS:	5 credits	Module Type:	Elective	
		Modul	e Descriptio	n		
Up to 25% of three	e-year-olds a	are overweig	ht or obese	in Ireland (Growing	g up in Ireland,	
2013). By the time	Irish childre	en reach nine	e years of ag	e there is a rate of	30% overweight or	
obese in some soc	ioeconomic	groupings (0	Growing Up I	n Ireland – Overwe	eight And Obesity	
Among 9-Year-Old	s, 2011). Th	e governmei	nt requires p	re-schools to have	a written policy on	
healthy eating requ	uirements t	hat complies	s with the Ch	ildcare Act (2006).	The pre-school	
manager is respon	sible for all	the food eat	en within the	e pre-school setting	g (Food and	
Nutrition Guideline	es for Pre-So	chool Service	es, 2004).			
The course will inv	estigate hov	w nutrition a	ind healthy e	ating are importan	t aspects of early	
childhood educatio	on. The stud	lents will exp	olore their ov	vn attitudes and be	eliefs to what	
constitutes a healt	hy diet. The	y will study	key concepts	of food and nutrit	ion, appreciate the	
difference between nutrient intake and the cultural diversity of food. They will briefly learn						
about safe food handling. Students will be made aware of the relevant legislation and food						
polices recommended by the statutory agencies.

Module Name:	Holistic Education for Early Childhood Settings					
Module Code:	EC8909	ECTS:5	Module Type	Elective		
		Module Descript	ion			
This module is bas	sed on an Erasm	ius + research proje	ect that developed t	this module based		
on exchange of pr	actice, creation	of tools and resour	rces for improveme	nt and		
measurement of process quality, through a research team of academics, ECE educators and						
primary school teachers locally, nationally, and at European level. Holistic ECE values 'the						
thinking and the feeling life' and promotes a vision of children as active, competent, playful						
learners. The mos	t up-to-date un	derstandings of how	w children learn sho	ow the		

interrelatedness of domains of development, and the importance of drawing on children's own talents, emotions, experiences, cultures and interests (Hayes et al., 2017). This module will translate these concepts into pedagogy through emphasising constructivist, participatory methodologies taking children's voices into account.

This module gives students space to engage in the conceptual reflection necessary for true 'expertise' in constructivist-inspired practices (Olsen & Bruer, 1996). It is hoped to influence the thinking of students and to affect their practice, by engaging them in promoting creative, constructivist practices. Ryan & O'Toole (2013) refer to this as the development of 'perspectives' but note that support may be needed for theoretical & conceptual knowledge to be rendered 'useful' for education.

In addition the module will focus on the micro moments in curriculum such as, innovative practical measures including.

page:	

Module Name:	A Rights based Approach to Early Childhood						
Module Code:	EC8910 ECTS:5 Module Type Elective						
	Modu	le Descriptio	n				
This module is base	ed on an Erasmus + res	earch project	that developed th	is module based			
on exchange of pra	actice, creation of tools	and resource	es for improvemen	t and			
measurement of p	rocess quality, through	a research te	eam of academics,	ECE educators and			
primary school tea	chers locally, nationally	y, and at Euro	pean level.				
Inclusive ECE value	s children's cultural, lir	nguistic and so	ocial backgrounds.	Research identifies			
cultural bias in standardised approaches to understanding children's achievement							
(MacRuairc, 2009). This module highlights inclusive practices, welcoming sociocultural							
diversity, and opposing standardised, exclusive perspectives and methods that may feed							
into socially reproductive experiences for marginalised groups. The purpose of this module							
is to consider these	e issues through the ler	ns of the UNC	RC.				

This module is innovative both in its conceptualisation of a rights based early education & in the practical responses identified. It draws its theoretical framework from Childhood Studies, in particular children's rights (Percy-Smith & Thomas, 2010); children's agency & voice (James, Jencks & Prout, 1998) & Critical Early Education Studies (Dahlberg & Moss, 2005).

page:	

Module Name:	Relational Reflexivity in Early Childhood Education					
Module Code:	EC8911	ECTS:5	Module Type	Elective		
	Modu	le Descriptio	n			
This module is bas	sed on an Erasmus + res	search project	that developed th	nis module based		
on exchange of pr	ractice, creation of tools	s and resource	es for improvemen	it and		
measurement of p	process quality, through	n a research te	eam of academics,	ECE educators and		
primary school te	achers locally, nationall	y, and at Euro	pean level. This m	odule is an		
approach to quali	ty early education that	offers a powe	rful vehicle for soc	cial inclusion,		
supporting "provi	sion that encourages pa	articipation, st	rengthens social in	nclusion and		
embraces diversit	y" (EC, 2014, p. 9). Rela	tional ECE for	egrounds relations	ships and		
interactions betw	een early childhood edu	ucators and ch	nildren, children ar	nd their peers,		
educators and par	rents, and settings and t	their commur	ities. Positive inte	eractions and		
relationships are i	more important for mea	asuring quality	y in early education	n than narrow		
numerical indicators (O'Toole, 2016). This module will support learners to understand that a						
focus on relationships requires a reflective capacity. It will draw on psychodynamic ideas						
such as unconditional positive regard and cognitive analytic therapy to support students to						
explore how they conceptualise relationships with children in the early years while also						
identifying practical approaches for building such relationships.

Module Name:	Leadership-Theory and Practice			
Module Code:	EC8905	ECTS:5	Module Type	Elective
Module Description				
People possess many different qualities, all of which are important in the workplace. An				
awareness of qualities, both in others and oneself is essential for the effective running of an				
organisation.				
Effective communication is necessary for effective leadership. This module explores				
strategies and techniques for effective communication that are deemed important as part			d important as part	

of management and leadership. Self-awareness and effective communication enhance

management and leadership skills. Motivation is an essential part of an effective workforce.

Effective management and leadership involves an awareness of motivation theories. Students will examine leadership styles and engage in self-reflection in the context of same Through a model of transformational leadership the motivation level of both the leader and the follower can be enhanced. This module explores a model of leadership: distributed leadership. The importance of effective communication in management and leadership, the leadership and management of change, and strategies and techniques for facilitating change will be discussed in this module

These skills are important in facilitating and implementing change in an early childhood setting.

Module Name:	Creative Technologies in Early Childhood Education Settings			
Module Code:	EC8906	ECTS:5	Module Type	Elective
		Module Descript	ion	
A broad body of literature recognises ICTs as key enablers of innovation and creativity in				
education (cf. Bre	cko, Kampylis &	Punie, 2014; Johnso	on, Adams Becker,	Estrada, Freeman,
Kampylis, Vuorikari & Punie, 2014; DES 2008). This course aims to identify, develop, apply				
and promote the digital skills and competencies required for early education in the 21st				
century using a broad range of creative technologies.				
This module is designed to enable students use technology effectively in an early				
educational setting. Furthermore, through engagement in this module students will				
familiarise themselves with digital technologies; their use for teaching, and their application				
to digital literacy for 21st century learners. Finally, this module introduces and familiarises				
students with diff	erent pedagogic	al frameworks and	their application to	o an ICT
environment with particular focus on early year's education.

page:	(learnonline.ie)

Module Name:	Early Childhood Education through the Medium of Irish			
Module Code:	EC8904	ECTS:5	Module Type	Elective
Module Description				

Due to the significant number of parents who wish to give their children an education through the medium of Irish, there is a significant number of Irish Language preschools in Irish speaking and in non-Irish speaking areas, as the first stage on the continuum of education through Irish. Many people are interested in working in Irish language preschools. Irish language preschools bestow an advantage on children who go on to attend all Irish primary schools and primary schools in Irish speaking areas. Irish Language Preschools immerse children in Irish and as a consequence of that they enhance their understanding of the language and they give the children a start in speaking Irish. Irish Language Preschools complement the efforts of families who rear their children through Irish. Students should note that a good standard of communicative competence in Irish is necessary to be able to engage effectively with this module and required assignments will need to be completed in Irish.

This module helps students develop an understanding of immersion education in general in various countries when minority languages are in question. Through tracing the history of immersion education in Ireland from 1900 students will study the current state of the immersion education system in Ireland at preschool level in Irish speaking and non-Irish speaking areas, and the specific aims of Irish Language Preschools. They will investigate the importance of the link between Irish Language Preschools and Irish Language Primary Schools, study State Policy with regard to Irish Language Preschools and the roles of organisations which support the sector and analyse the particular traits of the curriculum for Irish Language Preschools and the methodologies which are used.

Finally, this module enhances the ability of the students in the Irish language.

B.Sc. Early Childhood Education Programme Regulations

Registration

New and continuing students must register each academic year by the designated date. A charge is imposed for late registration (after 15 October). Students who do not register by the Friday of Teaching week 8 of their year of the programme, will be deemed to be withdrawn and services such as library and email accounts may be suspended. In such circumstances, undergraduate students must apply through the Admissions Office to the Registrar for re-admission.

Examinations

Annual examinations are held in December (Semester 1 exams) and in April or May (Semester 2 exams). Supplemental (repeat) examinations of both semesters are held in the following late August/early September.

The Court of Examiners will meet at the end of each academic year to moderate marks obtained by students.

Examination timetables are published well in advance of the dates of examination, by the examinations officer, on Moodle. The onus rests with each student to establish the dates of the examinations by consulting Moodle.

If a student is unable to sit an examination due to unforeseen circumstances, the student's tutor must be notified as soon as possible so that they can seek permission from the Registrar for the desired course of action (e.g. deferral until the next available sitting). Relevant supporting documentation must be submitted as soon as possible both to the Registrar's Office and the tutor e.g. med cert.

An unexcused absence from an examination is recorded as NS (non-submission/sitting).

Examination results are published on <u>MAESTRO</u>, the student management system. It is the responsibility of each student to inform themselves of the results of the examinations by consulting MAESTRO. Any student who has failed the annual or supplemental examinations should attend the script viewing morning on the day after publication of results and/or

contact their tutor. If the tutor is unavailable, the student should contact the Registrar's Office.

Students' results may be returned as "Withheld" for outstanding fees or library fines until the outstanding fees are paid.

In exceptional circumstances, following the supplemental examinations, a student's tutor may apply to the Court of First appeal for permission to sit a special examination. Special examinations may be recommended only where a student has been unable to complete their examinations at the supplemental session due to illness or other grave cause.

B.Sc. ECE Rules for Passing and Progression

- 1. A student's overall mark in each year is a combination of the student's mark in each module, calculated to the weighting allocated to each module.
- 2. Students cannot rise with their year until they have completed all the requirements of the previous year, including the field placement requirement
- 3. The following grade bands are used in assessing work in modules and in the overall results for the course:

Grade	Mark
70% +	First Class Honours - 1
60% - 69%	Second Class Honours, upper division - 2.1
50% - 59%	Second Class Honours, lower division – 2.II
40% - 49%	Third Class Honours – III
30 – 39%	Fail – F1
29% and below	Fail – F2

Compensation

4. Students must receive at least 40% in every module in order to complete the requirements of the year. However, a single failing result (between 35% and 39%) in

one 5 ECTS credit module, except the field placement modules, may be compensated, provided no other module has been failed.

- 5. In the case of a 5 ECTS credit module that has more than one assessment point, internal compensation for a single failed assessment component within the module is permitted, unless specified otherwise. The failed component must be at the F1 level (30% or higher). Where a failed component is at F2, or where more than one component is failed, internal compensation is not permitted.
- 6. No compensation is permitted in the following
 - In the Field Placement module across all years.
 - In the Research Proposal module in Junior Sophister year.
 - In 10 ECTS credit modules. (EC8107 Psychology and the Developing Child, EC8102 Dispositions and Play, EC8204 Models of Curriculum and Assessment, EC8203 Understanding Childhood in Context, EC8301 Constructions of Childhood, EC8302 Interactions and Relationships
 - Across modules in the Senior Sophister year.
 - Where another module is failed.

Annual Examinations

- If a student fails a module, (i.e. gets 39% or lower in a non-compensatable module or gets 34% or lower in a compensatable module), in the annual exams, a supplemental exam or assignment must be taken at the next available sitting.
- Where 10 ECTS module comprises of more than one assessment component, each component must be passed separately. However, students repeat only the failed component unless otherwise specified.
- 9. If a module assessment component(s) is not completed or submitted, the result for the component(s) is a NS (non-submission). The student fails the module even if the student's overall average on completed/submitted work exceeds 40%. In such cases, NS is recorded against the passing grade.
- 10. In the Senior Sophister year, students who fail both the portfolio and the presentation of the field placement have failed the placement module overall. In

such an instance, the overall internship module must be repeated on books the subsequent academic year. The result is not capped.

Supplemental Examinations

- 11. If a student fails a module (i.e. with a mark of 39% or lower) in the annual exams, a supplemental exam or assignment must be taken at the next available sitting.
- 12. Students are required/permitted to only take supplemental exam(s)/assignments in the assessment components(s) that are failed or not submitted, unless specified otherwise.
- 13. If a student in any of the four years has an unexcused non-submission/non-sitting and submits/sits at supplemental sitting, the mark for work not previously completed counts as the second attempt and it is capped at 40%, even where a higher mark was warranted.
- 14. In the case of Fresh students who take a supplemental assignment due to a failing mark in the annual examinations, there is no capping of module marks at supplemental examinations. The overall end-of-year result for students who progress on the basis of marks attained at a supplemental examination is recorded as "pass at supplemental" e.g. 52% 'Pass at Supplemental'.
- 15. In the case of Sophister students who take a supplemental assessment due to a failing mark in the annual examinations, modules marks are capped at 40% at supplemental examinations, even where a higher mark is warranted.
- 16. If a student fails an assessment component of a module in the supplemental exams by receiving less than 30% in that module component, irrespective of whether or not the module overall has been passed, all assessment components of the module must be taken at the next available sitting, unless specified otherwise.
- 17. If a student fails a module in the supplemental exams, with the exception of the Field Placement and SS Dissertation modules, the student may be permitted by the Court to repeat the year and take the module at the next available opportunity (i.e. the next annual exams). Should the student be unsuccessful in the second annual exams (i.e. third attempt overall), the student may take the exam one final time the

Programme Regulations

following autumn. Should the student be unsuccessful at this time, no further repeat is possible.

- 18. The Court of Examiners decides if a student may be permitted to repeat the year on books or off books. Students who fail one or two but who pass the field placement module (both parts) will be recommended by the Court to repeat the failed modules off books. Students who fail one or two modules and who fail field placement and students who fail three or more modules will repeat all modules on books.
- 19. Students granted permission to repeat the year off books and to take examinations only will have the new marks and new overall grade presented to the annual Court of Examiners, which will include the marks for the repeat examinations and marks carried forward from the previous academic year. When one or more modules is/are repeated for a year on books or off books, the student's overall average grade is not capped at the overall annual grade from the previous year.

Senior Sophister Dissertation

- 20. A student who fails the dissertation module may be granted by the Court of Examiners up to a maximum of two repeat attempts of this module.
 - Students may be granted a first repeat attempt at the supplemental exam in the autumn. If this is granted, students are required to submit a revision of the original dissertation that was submitted for the annual examination. Additional supervision is not available over the summer months. Assistance to students is limited to feedback provided at script viewing day and to Moodle online resources. The mark awarded for this supplemental dissertation is capped at 40%.
 - Students who are unsuccessful in the dissertation module at the supplemental examination may be permitted by the Court of Examiners to repeat the module on books, as a final attempt, the following academic year. They are required to select and undertake a new research question. The mark awarded will not be capped. Should the student be unsuccessful at this time, no further repeat is possible.

 If a student fails to complete or submit the dissertation (for the annual or supplemental examinations, or both), without notification and evidence of Ad Mis or medical circumstances, the results for the module is recorded as INC (incomplete) and the overall grade for the year is recorded as a FAIL. The mark awarded will not be capped.

End of Year Grades

- 21. Decisions about raising borderline marks are made at the Court of Examiners.
- 22. Should a Freshman student's overall mark be borderline (i.e. 49%, 59% and 69%) the Court may recommend that their grade be rounded up to the next grade level if the student has:
 - i. Passed all modules in the annual exams.
 - ii. A preponderance (more than 50%) of the module grades in the next higher grade level.
 - iii. The next higher grade level in one of the 10 ECTS modules.
- 23. In calculating a student's final degree result, marks from the Junior Sophister and Senior Sophister years will be used with the weighting 35/65. Students will receive an end-of-year result for the Junior Sophister year and for the Senior Sophister year in addition to their degree classification.
- 24. Borderline marks are not considered for rounding up in Junior Sophister.
- 25. In the case of a Senior Sophister student whose overall degree mark is borderline, all module marks across Junior Sophister are considered.
- 26. In order for a borderline mark to be raised at the end of Senior Sophister year, a student must have:
 - iv. The next higher grade level in the dissertation.
 - v. Senior Sophister placement grades in the next higher grade level.
 - vi. A preponderance (more than 50%) of module grades in Senior Sophister year in the next higher grade level.
 - vii. Passed all Senior Sophister modules and have at most one failed module in Junior Sophister year.

Level 7 Degree Exit Option

In exceptional circumstances (typically related to medical/health, financial or professional circumstances), where a student has successfully completed all requirements of years 1, 2 and 3 of the course, the student may exit from the B.Ed. or B.Sc. course with an ordinary (level 7) B.A. A student who wishes to apply for exiting with a level 7, B.A. degree should apply to the Registrar's Office to do so at the earliest possible opportunity and should supply relevant documentation to support the request.

A student who fails fourth year may apply to exit the course at Level 7.

In each case applications to exit a course at level 7 will be considered by the Registrar and decided on a case-by-case basis.

Students who exit with a level 7 ordinary B.A. degree may not re-enter the course.

Bachelor Degree (NFQ Level 7)

Qualifications which signify completion of the first cycle at ordinary Bachelor's level are awarded to students who have completed a course of study which enables them to show:

- A comprehension (that builds on and supersedes their general secondary education) of the theory, concepts and processes pertaining to a field or (in the case of joint degrees) fields of learning.
- b. A knowledge, supported by the use of advanced textbooks, of one or more specialised areas.
- c. That they can apply this knowledge and comprehension in a manner that indicates a thorough and informed approach to their work or vocation, and have competences typically demonstrated through devising and sustaining arguments, and formulating and solving problems with their field of study.
- That they have a mastery of a number of specialised skills and tools which they can use selectively to address complex problems, including design problems.

- e. That they have the ability to devise data gathering experiments, and to gather and interpret relevant data to inform independent judgements which include reflection on relevant social, scientific or ethical issues.
- f. That they have developed those learning skills which are necessary for them to continue to undertake further study at an honours Bachelor or a Higher Diploma level.

Note that an award at Level 7 will not meet the requirements for progress onto some Level 9 courses, such as the Professional Masters of Education (Primary).

External Examiner

Dr Ioanna Palaiologou, University of Bristol.

Submission of Course Work

All course work, consisting of projects, assignments, folios, journals and exercises must be submitted by the due date to avoid the imposition of penalties. The penalties that apply are:

- Ten percent (10%) of the marks awarded will be deducted from work which is submitted up to one week after the submission due date.
- Twenty percent (20%) of the marks awarded will be deducted from work submitted between one and two weeks after the submission due date.
- Assignments will not be accepted more than two weeks after the due date and the student will be returned as a non-submission (NS).

With advanced notice and good reason, due dates may be extended by the lecturer concerned at their discretion in consultation with the particular student and their tutor (and Registrar, if required) as appropriate.

Requests for an extension are made in writing to the lecturer and may be granted on medical grounds (with medical certificate required for submission) or in respect of *ad misericordiam* situations (with the approval of the student's personal tutor). In cases where an extension has been granted, the new date and the signature of the lecturer needs to be entered on the assignment cover sheet. For the purposes of applying penalties, the revised due date becomes the due date for submitting the assignment.

Students are required to keep a copy of all assignments submitted.

If an assignment is failed or not submitted in the annual exams, students may be permitted by the Court of Examiners to submit a supplemental assignment. The deadline for receipt of supplemental assignments is 1.00pm on the first day of the written examinations. The assignment is uploaded to the dedicated supplemental Moodle page on or before the specified deadline.

Supplemental assignments received following the deadline will not be accepted unless accompanied by written evidence (e.g. a medical certificate) of mitigating circumstances. Under no circumstances can supplemental assignments be accepted after 17.00 on Friday of the supplemental exams week.

Plagiarism

Please read the following definitions and principles that have been developed about plagiarism. This should be read in conjunction with the MIE policy on plagiarism, which is available on the MIE website.

General

All members of the academic community use and build on the work and ideas of others. It is commonly accepted, however, that we build on the work and ideas of others in an open and explicit manner, and with due acknowledgement.

Plagiarism is the act of presenting the work or ideas of others as one's own, without due acknowledgement.

Plagiarism can arise from deliberate actions and also through careless thinking and/or methodology. The offence lies not in the attitude or intention of the perpetrator, but in the action and in its consequences.

It is the responsibility of the author of any work to ensure and that they do not commit plagiarism.

Plagiarism is considered to be academically fraudulent, and an offence against academic integrity that is subject to the disciplinary procedures of the Institute.

Examples of Plagiarism

- a) Copying another student's work.
- b) Enlisting another person or person(s) to complete an assignment on the student's behalf.
- c) Procuring, whether with payment or otherwise, the work or ideas of another.
- d) Quoting directly without acknowledgement, from books, articles, or other sources, either in printed, recorded or electronic format, including websites and social media.

Examples (c) and (d) in particular can arise through careless thinking and/or methodology where students:

- i. Fail to distinguish between their own ideas and those of others.
- ii. Fail to take proper notes during preliminary research and therefore lose track of the source from which the notes were drawn.
- Fail to distinguish between information which needs acknowledgement because it is firmly in the public domain, and information which might be widely known, but which nevertheless requires some sort of acknowledgement.
- iv. Comes across a distinctive methodology or idea and fail to record its source.

All the above serve only as examples and are not exhaustive.

Plagiarism in the Context of Group Work

Students should normally submit work done in co-operation with other students only when it is done with the full knowledge and permission of the lecturer concerned. Without this, submitting work which is the product of collusion with other students may be considered to be plagiarism.

When work is submitted as the result a group project, it is the responsibility of all students in the group to ensure, so far as is possible, that no work submitted by the group is plagiarised.

Self Plagiarism

No work can normally be submitted for more than one assessment for credit. Resubmitting the same work for more than on assessment for credit is normally considered self-plagiarism.

Avoiding Plagiarism

Students should ensure the integrity of their work by seeking advice from their lecturers, tutor or supervisor on avoiding plagiarism.

When assignments are submitted, students must complete a cover sheet that contains the following declaration:

"I have read and I understand the MIE plagiarism policy. I have also completed the online tutorial on avoiding plagiarism "Ready, Steady, Write" located at <u>Ready Steady Write</u> <u>Plagiarism Tutorial - Avoiding Plagiarism - Library Guides at Trinity College Dublin (tcd.ie)</u>"

All incidents of suspected plagiarism in the Institute will be dealt with under the MIE Education Plagiarism Policy.

Academic Integrity Guidelines

For the academic year 2023-24 there is a new voluntary set of guidelines which are, at time of publication of this handbook, are out for consultation with staff and students. All input on the draft guidelines is welcome. Please contact <u>registrars@mie.ie</u> if you wish to contribute or receive a copy of the draft guidelines.

Prizes and Awards

- Marino Institute of Education presents a gold medal to Senior Sophister student(s) who have an overall degree mark of 73% or above, based on results of both Sophister years, weighted 35:65 and where all modules in Senior Sophister year have a mark of 70% or higher.
- Nano Nagle award is presented to the student who achieves the highest overall mark in B.Sc. Early Childhood (based on results in the Junior Sophister and Senior Sophister years). If more than one student falls into this category, the mark awarded for the dissertation will also be considered.
- Bonn Ealaíon Award. This Award recognises potential leadership in arts-ineducation from continued engagement with the MIE arts, the concurrent development of a personal arts practice or exemplifying excellence in arts-ineducation related studies or research at MIE.

Academic Resources

Library Services

MIE Library is housed in St. Patrick's building and provides a range of services and facilities to support teaching, learning and research at MIE. The Library holds just under 30,000 items on its shelves and subscribes to a growing number of electronic resources, including access to over 7,000+ eBooks and 14,000+ eJournal titles across 8 academic databases, accessible through the Library website. The Library contains a reference collection, short-loan and long-loan academic text collections as well as adult fiction. Library staff also provide expert support on developing research skills and accessing and using the Library's collection of scholarly resources. For more information and for opening hours please see the <u>library</u> website.

Learning Tools

MIE uses a variety of online tools to deliver asynchronous and synchronous learning content to students. MIE utilises the following learning tools that are based on current research on instructional design principles, where a pedagogy first approach to technology integration is preferred in MIE.

Moodle is MIE's learning management system (LMS). All programme learning content will be made available to students via Moodle and this platform is used to host online classes, manage assignments, provide learner supports and create interactive content.

MIE also uses the video conferencing platforms integrated into the Institutional VLE to support online classes online. Panopto is MIE's video content management software. All lectures that are recorded will be made available to students via the Panopto Moodle plugin. Panopto's recording functionality will also enable students to submit video presentations for assignments.

MIE utilises Turn-it-in, a plagiarism checking and prevention service of essay-based assignments.

All students in MIE are provided with a free Office 365 licence for the duration of their studies. Office 365 allow access to online versions of Microsoft suite applications such as Word, Excel and PowerPoint for content creation, Outlook for email, OneDrive for cloud Page **72** of **94**

document storage and Teams for collaboration. Office 365 licence holders may sign into Office on any device or download Office to a device for offline access.

All students also have access to an online virtual induction before they can log into any of MIE's IT & eLearning systems.

Education Office

The Education Office is located in St Mary's building and is a central hub offering a number of services to students, including book sales and assignment submissions/collections. We also work closely with the Registrar's Office to monitor student absences and ensure attendance records are up to date.

Within the Education Office are the placement administrators who monitor all of the B.Ed, B.Oid, ECE, PDEFE and Ed Studies placement arrangements. Also located in the office is the International Office, which manages our Erasmus, IFP and other programmes and the administrators are there to offer support to our international students.

We provide varied support to the wider staff throughout the year and therefore Education Office staff can often be found helping out at events, covering the main reception desk or providing extra assistance in classrooms.

The office is open Monday to Friday from 9.00am to 5.00pm and there are a number of fluent Irish speakers available for those who wish to communicate in Irish

Guidelines on the Presentation of Written Assignments

Presentation of Course Work

In keeping with the nature of a third level degree, all assignments are expected to be written in clear, accurate language; to cite appropriate references to sources used whenever relevant; and to contain a full bibliography of publications cited.

General Features of Presentation

Assignments should be carefully collated and submitted as specified in individual modules. Any associated materials (for example, video files or audio files) should be carefully labelled and a list provided with the assignment.

Pages should be numbered and sufficient margins left to allow for comments. Neatness is important and attention should be given to good presentation – lettering, layout of photographs, illustrations – and to the accuracy of expression – paragraphing, spelling and punctuation. Always check the accuracy of what you have written.

A title page should be provided stating:

- the course and component to which the assignment relates.
- the title of the assignment.
- the name of the lecturer to whom the assignment is being submitted.
- the name of the degree.
- the date of submission.
- your name and student number.
- declaration that the work is your own original work (or the original work of a group, where relevant).

A bibliography should follow the text and any appendices.

References should follow the system of the American Psychological Association (APA).

Notes on Presenting Word-Processed Course Work

A4 paper should be used. There should be double spacing between lines. Each page should have a left-hand margin of at least 20mm and margins at head, foot and right hand side, of at least 15mm

Appendices

Any particularly long notes which cannot be avoided may be given in an Appendix. These may include statistical tables of figures, graphs, diagrams or examples of children's work. Their significance, origin and date should be clearly shown and a reference should be made to them in the text of the essay.

Do not place anything in an Appendix which forms part of a detailed and continued argument in the body of the essay.

Information about Sitting Examinations

A seating map will be posted outside the exam venue on the day of the examination. For all exams a 3-digit seat number preceded by a letter will be published to the student record on MAESTRO by the Registrar's Office. Students will also need their 8-digit student number, which is on the student card. Scripts are marked anonymously and therefore it is important that all the seat number and student number is recorded, by the student, on the cover of all examination scripts. In the case of B.Sc.ECE, C456 is an example of the seat number format.

Students are advised to allow time to arrive at least 15 minutes before the start of the exam so as to check where they will be seated. Students must keep their student card on the exam desk at all times during examinations. Pencil cases etc. need to be placed under the chair to adhere to the TCD "clean desk" policy. Mobile phones must be turned off completely in the exam centres.

Guidelines for Revising Examination

Revision and exam techniques are skills that can be learned about and practiced.

Revision Time

Planning Revision Time

- Find out the examination schedule.
- Decide *when* you are going to start and work out how long that gives you.
- Decide what to cover and in what depth. Think from the examination back to revision. For example how much can you cover in 45 minutes?
- Plan a timetable that is realistic.

Using Revision Time

Revision time must be active. The more material is manipulated and thought about the easier it is to recall.

Diagrammatic Notes: One Strategy

- Draw a box in the centre of a blank page and write the topic in the box.
- From memory, add in the main themes/arguments, important authors, etc in subboxes radiating from the centre.
- Then do the relevant revision.
- After this, from memory, fill in anything you left out.
- After about 24 hours, try a recall test.

(Summary grids or tables can be a useful alternative for some topics).

Past Papers and Specimen Papers

Have a go at:

- Tackling questions and writing skeleton plans for answers.
- Writing a short introduction to a question.
- Supporting the argument: produce a plan, writing the main points and arguments down in the left hand column and supporting material in the right hand column. For example – relevant evidence, examples, illustrations, case study materials, texts, an authority associated with theory, etc.
- Attempting a whole question under timed conditions.

- Taking an examination question and imagine that you set it. List what you would expect to give marks for in an answer.
- Planning essay answers with others in a brainstorming session: spend 5 minutes writing an introduction to the same question, then compare and discuss, looking at their relative merits.

Examination Technique

Examination technique, like revision technique, is a very personal thing. What works for one person can be unhelpful for another, it is important to learn through experience what works for *you*, but some initial advice can form a starting point.

Some common mistakes in examinations

- Failure to follow basic examination instructions.
- Misallocation of time for example, only answering 3 of 4 questions which is throwing 25% of marks (if all questions carry equal marks).
- Failure to answer the question set, misreading or misinterpreting the questions: writing 'all I know about....'
- Basing answers largely on 'common sense' rather than on course material.
- Failure to illustrate and support arguments, for example, with reference to specific theories, authorities, case studies, etc.
- Lack of planning leading to weakly structured, disorganised answers.
- Lack of conclusions so answers 'peter out'.
- Writing illegibly.

Examination Strategies

Read exam instructions carefully.

- How many questions have to be answered? For example, in a 3-hour paper, if 4 questions have to be answered you have approximately 45 minutes to answer each question.
- Read through the paper and choose questions carefully, allowing 5-10 minutes for this. Attempt them in the order you feel happiest with.
- Don't be panicked by the 'scribblers'.

• Read the question carefully; underlying key words – remember the aim is to answer the specific question, not just to air knowledge.

Brainstorm

- Jot down relevant ideas as they come to you, in the answer book, note down main themes and arguments, ideas on concepts, illustrations and examples and relevant sources/authors.
- Sort out the jotted points into a sensible sequence. Just put a number by each point to indicate the order you decide on.

Planning

- Jot plans in the answer books and mark them off neatly afterwards to indicate rough work.
- Some students like to plan all the answers first. Others prefer to take each in turn do what suits *you* best.

Writing Up Answers

- Keep referring back to the question in your answer to keep you on course and show that you are addressing it.
- Do not forget introductions and conclusions. Use introductions to indicate clearly how you intend to tackle the question. If the questions is at all ambiguous, state how you have interpreted it. Draw your argument together clearly in a conclusion.
- If you suddenly remember an important point, write it in a box with an arrow or asterisk to show where is *should* have gone don't spoil your flow.
- Write legibly.

Timing

Remember to stick to timing as rigidly as you can: when you are coming to the end of the time allotted to a question, try to round it off and then move on to the next. If you do run short of time for the last question, put something down, for example, 'if I had time I would have....'

Key words used in assignment and exam questions	
Account for	Explain, clarify, give reasons for
Assess	Determine the value of, weigh up
Compare	Look for similarities and differences
	between
Contrast sharply	Set in opposition in order to bring out the
	differences
Criticise	Make a judgement (backed by discussion
	of the evidence or reasoning involved)
	about the merit of theories or opinions or
	about the truth of facts
Describe	Give a detailed account of
Discuss	Explain, then give two sides of the issues
	and any implications
Evaluate	Make an appraisal of the
	worth/validity/effectiveness of something
	in the light of its truth or usefulness
Examine the argument that	Look in detail at this line of argument.
	Explain. Give details about how and why it
	is
To what extent	
How far	Usually involves looking at the
	evidence/arguments for and against and
	weighing up
Outline	Give the main features or general
	principles of a subject, omitting minor

Key words used in assignment and exam questions	
	details and emphasising structure and arrangement
Summarise	Give a concise, clear explanation or account of presenting the chief factors, and omitting minor details and examples

Typical Criteria for Assessment of Presentation

Preparation

- Depth and breadth of reading
- Clarifying roles
- Deciding objectives
- Structuring the agenda
- Producing the agenda on time
- Distributing reading tasks

Presentation

- Introducing the topic
- Explaining aims and objectives
- Speaking clearly and confidently
- Use of handouts
- Use of audio-visual aids
- Use of IT
- Managing interest in the topic

Managing the Group

- Moving the agenda along
- Maintaining relevance

- Summing up where necessary
- Involving everyone
- Not allowing anyone to dominate
- Encouraging a relaxed atmosphere
- Timing the discussion

Discussion/Analysis

- Awareness of relevant issues
- Stimulating informed discussion
- Originality of thought and judgement
- Taking account of others' viewpoints
- Responding to questions
- Providing information
- Deciding what is relevant
- Clarifying discussion
- Drawing a positive conclusion from the group

Grading Criteria

These grade descriptions are intended to provide guidelines for the marking of coursework and examinations in the B.Ed., B.Sc. and PME-Primary programmes. They are not to be taken as rigid prescriptions, but as general indications of the qualities that are looked for at each level of classification. Markers should exercise their discretion in applying these guidelines and should not expect every criterion to be fulfilled in all cases for a particular grade to be awarded. For example, some criteria may be more applicable to coursework than to examination answers

I- First Class (70-100%)

First class work represents an excellent to outstanding performance demonstrating a thorough understanding of the subject. In addition to a mastery of a wide to full range of the standard literature and/or methods and techniques of the subject, work at this level

shows independence of judgement and evidence of attainment beyond the standard material. It will frequently demonstrate characteristics such as insight, imagination, originality and creativity. A first class answer will represent a comprehensive and accurate answer to the question that will exhibit a detailed knowledge of the relevant material as well as a broad base of knowledge. Theory and evidence will be well integrated and the selection of sources, ideas, methods or techniques will be well judged and appropriately organised to address the relevant issue or problem. It will demonstrate a high level of ability to evaluate and integrate information and ideas, to deal with knowledge in a critical way, and to reason and argue in a logical way. Where relevant, it will also demonstrate a high level of ability to analyse information, to make sense of material, to solve problems, to generate new ideas and concepts and to apply knowledge to new situations. The presentation of information, arguments and conclusions will be fluent and clearly written and may also show particular lucidity in expression appropriate to the subject.

What differentiates a first class piece of work from one awarded an upper second is a greater lucidity, a greater independence of judgement, a greater depth of insight and degree of originality, more evidence of an ability to integrate material, and evidence of a greater breadth of reading and research in the first that is not present in the upper second.

Thus a first class piece of work shows positive characteristics such as:

- Answers the question clearly and comprehensively, in a focused way.
- Has an excellent structure and organisation.
- Demonstrates characteristics such as insight, imagination, originality and creativity.
- Demonstrates the ability to integrate information.
- Exhibits sound critical thinking.
- Exhibits independence of judgement.
- Clearly explains relevant theory and cites relevant evidence.
- Contains reasoned argument and comes to a logical conclusion.
- Gives evidence of wide relevant reading.
- Includes a sufficient number of appropriate examples.
- Demonstrates the ability to apply learning to new students and to solve problems.
- Is lucid and well written.

• Lacks errors of any significant kind.

All pieces of first class work may not have all of the characteristics above, but all such work will have few, if any, negative characteristics.

II.1- Upper Second Class (60-69%)

Work at upper second class level displays a sound and clear understanding of the subject and demonstrates a good grasp of a wide range of the standard literature and/or methods and techniques of the subject. An upper second class answer constitutes a well-organised and structured answer to the question that is reasonably comprehensive, generally accurate and well informed. It will normally demonstrate a greater breadth of knowledge than would be gained merely from the lecture notes and basic required reading. It will demonstrate some ability to evaluate and integrate information and ideas, to deal with knowledge in a critical way, and to reason and argue in a logical way. Where relevant, it will also demonstrate an ability to analyse information, to make sense of material, to solve problems, to generate new ideas and concepts and to apply knowledge to new situations. The presentation of information, arguments and conclusions will be clear and well written.

What differentiates an upper second class piece of work from one awarded a lower second is the greater success in answering the question, the additional understanding displayed, the greater evidence of additional reading, the improved structure and organisation, the superior quality of the argument, and the level of critical thinking displayed.

Thus, an upper second class piece of work shows positive characteristics such as:

- Answers the question clearly and fully.
- Has a good structure and organization.
- Shows evidence of a very good understanding of the topic.
- Shows clear evidence of relevant reading and research.
- Clearly explains relevant theory and cites relevant evidence.
- Contains reasoned argument and comes to a logical conclusion.
- Includes highly relevant ideas.
- Uses relevant examples.

- Demonstrates the ability to apply learning to new situations and to solve problems.
- Is well written.
- Lacks errors of any significant kind.

Upper second class work usually has few negative characteristics, but may be limited in the sense that it:

- Could demonstrate more in the way of insight, imagination, originality or creativity.
- Does not answer the question in as fully and comprehensive a manner as would be possible.
- Could demonstrate more ability to integrate information.
- Could exhibit more critical thinking.
- Could exhibit more independence of thought.

II.2 – Lower Second Class (50-59%)

Work at lower second class level displays knowledge of the standard material and approaches of the subject and a familiarity with much of the standard literature and/or methods. A lower second class answer may constitute a relatively simplistic answer to the question, and is likely to be based on a narrow range of sources, such as lecture notes and the basic required reading, rather than being indicative of wider reading. It usually displays a basic ability to use relevant sources, methods or techniques normally applied in the subject to achieve some success in solving problems or marshalling arguments to reach a conclusion. The work may show some inconsistency in standard, may contain occasional technical or factual flaws, and may exhibit some difficulties with the organisation of material or with the full understanding of a problem or issue, but it is adequately presented and may include some critical judgement applied to analysis or the application of standard ideas or methods.

What differentiates a lower second class piece of work from one awarded a third class grade is the greater success of the lower second in answering the question, together with the possession of more relevant information, a more coherent argument and an improved structure, although neither the answer to the question nor the structure may be incapable of improvement. Work at lower second class level will tend to possess some or all of the following positive characteristics:

- Attempts to answer the question.
- Shows evidence of a basic to good understanding of the topic.
- Shows evidence of some relevant reading or research.
- Includes some relevant ideas.
- Includes some relevant examples.

Work at lower second class level will tend to possess some or all of the following negative characteristics:

- The attempt to answer the question may not be completely successful.
- Does not contain a sufficiently well-structured argument.
- Does not offer sufficient evidence to justify assertions.
- Does not include sufficient relevant examples.
- The style of writing could be improved.
- May contain some minor errors.

III – Third Class (40-49%)

Work at third class level contains evidence of study of the appropriate material and displays a level of presentation at least minimally commensurate with the award of an honours degree, but it often reflects only a limited familiarity with the standard literature and/or methods of the subject. A third class answer constitutes at least a minimal attempt to answer the question posed, but the answer may omit key points and/or contain assertions not supported by appropriate evidence. It may display superficiality in understanding and/or the use of material, an over reliance on knowledge at the expense of development or argument, analysis or discussion, and it may lack continuity, or be inadequately organised. Nonetheless, work at this level does show an ability to refer to some standard sources, ideas, methods or techniques normally applied in the subject and to achieve some success in solving problems or marshalling an argument to reach a conclusion. What differentiates a third class piece of work from one that fails is that a third comprises an attempt to answer the question informed by some relevant information and without any major error, while a fail either does not contain an adequate attempt to answer the question, or does not contain sufficient relevant information, or contains at least one significant error.

Work at third class level may possess some or all of the following positive characteristics:

- Attempts to answer the question.
- Shows modest evidence of understanding of the topic.
- Shows modest evidence of relevant reading or research.
- Includes a few relevant ideas.
- May include some relevant examples.

Work at Third class level may possess some or all of the following negative characteristics:

- The attempt to answer the question may not be very successful.
- Does not contain a sufficiently well-structured argument.
- Does not offer sufficient relevant examples.
- Contains one or more important errors.

IV - Fail - (0-39%)

The 'fail' grade is sometimes broken down into two bands: F1 and F2. An answer at the F1 level (30-39%) represents a failure to adequately answer the question, but the possession of at least some relevant information. The failure to provide an appropriate answer may be due to a misunderstanding of the question, or to one or more of the following deficiencies: it may contain only a small amount of relevant information, the material itself may have been misunderstood, the answer may be poorly or incoherently presented, or the answer may not relate to the question asked. An answer at the F2 level (0-29%) normally contains no or only the most minimal amount of information relating to the question, or may demonstrate a complete misunderstanding of the question, or a misunderstanding of the material relevant to its answer such as to render the answer meaningless. Work at fail level tends to have few positive characteristics, except possibly when the grade has been

awarded because of the inclusion of a major error, the presence of which is sufficiently important to outweigh any positive features of the answer. It is also possible for an otherwise good piece of work to be awarded a fail grade because it fails to answer the question posed. The absence of positive characteristics could also result from the fact that the answer is very short (e.g., when a student runs out of time in an examination and writes very little).

Work awarded a fail grade tends to possess some or all of the following characteristics:

- Represents a failure to answer the question (though may be an answer to a different question).
- Shows no or only a little evidence of understanding of the topic.
- Shows no or only very little evidence of relevant reading or research.
- Includes no or very few relevant ideas.
- Does not contain a structured argument.
- Does not offer evidence to justify assertions.
- Does not include relevant examples.
- Contains multiple or major errors.

Student Support Services

Tutoring Supports

Upon registration in MIE, each student is assigned a personal tutor. The tutor is not an academic support, but rather, someone who is available to meet with the student about anything that adversely affects their attendance, studies or participation in any aspect of the programme. This person is available to act as an advocate for you, and to help you understand your options, so that you can successfully complete your programme of study. Students can obtain the contact details for their tutor in MAESTRO (MIE's online student records system).

For all student services, see <u>https://www.mie.ie/en/student_life/student_support_services/</u>

Student Medical Services

Fairview Medical Centre offers a health service for all MIE-registered students. The Medical Centre has a team of doctors and nurses on duty. Services available include illness review & fitness to attend college, phlebotomy, injections, clinical dressings, well woman services, asthma services, etc. Colds and flu are both viruses and do not generally need a doctor's visit. Each student can avail of three free visits for each academic year under this arrangement. Additional visits are possible at a reduced fee. There is a local pharmacy across the road from the Institute, on Philipsburgh Avenue, for over-the-counter remedies. Fairview Medical Centre is a 15-minute walk from the College and is open from 9.00am - 5.00pm on weekdays. There is an emergency service on Saturday mornings. The centre's website is https://fairviewmedicalcentre.com/

Student Counselling Service

Registered MIE students can avail of the Student Counselling Service (SCS) to gain that time and space to explore any issues that are of concern to them and that affect their studies. You can make your first appointment to meet with a Student Counsellor by using our Online Booking System - <u>https://scs.mie.ie/firstappointment</u> or by attending the lunchtime drop ins Tues and Thurs 12:30pm – 1:30pm (Mon & Wed TBC) starting 14th September. These lunchtime drop in times are available during term time, you do not need to book an appointment, you just turn up on the day (first come first serve basis). If you need to urgently speak to the Student Counsellor, please send an email requesting a Priority Appointment. A Priority Appointment is offered daily Monday - Friday at 2pm

The Student Counselling Service is located in Rooms 36, 41 & 42 in St Pat's Hall (next to the Library, don't forget your ID card to enter the building). Keep an eye for various events the Student Counselling Service are running that may help with self-care, wellbeing, and positive mental health. Student Counselling Appointments are generally offered Mon – Fri, between 10:00am – 5:00pm

You can contact the Student Counselling Service by emailing us at <u>marinocounselling@mie.ie</u>

You can also check out our Self – Help resources. See the Lib Guide on Mental Health and Wellbeing - <u>https://mie-ie.libguides.com/c.php?g=703489</u> or in the Library

Books and online literature on:

Worrying

Confidence/Self Esteem

Self – Compassion

Difficult Times

Time Management

Effective Learning

Self-Care

...and more

Stay tuned for the launch of Togetherall, which is an online mental health and wellbeing peer support that gives access to a safe, anonymous and professionally moderated community 24/7/365.

Alternatively you might like to reach out to the following **external Services** who offer support both during the daytime and after hours:

 A 24/7 crisis text line is available to all students. Start a conversation by texting MIE to 50808.

- Call the Samaritans 24/7 on 116 123 or find information on their website https://www.samaritans.org/ireland/how-we-can-help/contact-samaritan/
- AWARE can be reached 7 days a week from 10am to 10pm on 1 800 80 48 48 or on their website <u>https://www.aware.ie/support/support-line/</u>
- Pieta House provide free therapy to those engaging or previously engaged in selfharm, suicidal ideation and to those who have been effected by suicide. They can be reached 24/7 on 1800 247 247 or via text to 51444, more information can be found on their website <u>https://www.pieta.ie/how-we-can-help/feeling-suicidal/</u>
- For your nearest A&E please visit the HSE <u>https://www.hse.ie/eng/services/maps/</u>

Disability Services

MIE's Disability Service is delivered in conjunction with Trinity College Dublin Disability Service since 2012. The Disability Service operates on a disability needs basis, providing direct support to students who disclose a disability via both a meeting with a Disability Officer and a referral to other disability supports such as Assistive Technology (AT) and Occupational Therapy (OT) services, as appropriate, in MIE or Trinity College Dublin (Trinity).

Students with a disability are encouraged to register with the Disability Service at MIE to seek supports where the disability could affect their ability to participate fully in all aspects of their life in college. To find out more about registering with the Disability Service or the supports that are available to you can check out our Moodle page <u>Disability Service</u> or email access@mie.ie

Reasonable Accommodations

MIE is committed to ensuring that students with disabilities have as complete and equitable access to all facets of student life as can reasonably be provided. This is in accordance with the Disability Act 2005, the Equal Status Acts, 2000 (as amended), and the Universities Act, 1997. MIE welcomes applications from prospective students with disabilities and endeavours to assist all students in realising their potential as professional educators by offering a range of supports, including reasonable accommodations.

In supporting the participation of students with disabilities in programmes that confer eligibility to practice as a teacher, the Institute strives to balance principles of inclusiveness with the high standards and duty of care required of educators for learners. MIE has adopted a code of practice which is applicable to all students with disabilities studying at the Institute. Which can be found here <u>Code of Practice for Students with Disabilities</u> and <u>Consent to Disclose and Share Disability Information</u>.

MIE is committed to providing reasonable accommodations for students who have a learning difficulty or a disability so that they can participate fully in their educational placements. A reasonable accommodation is any action that helps to alleviate a substantial disadvantage due to a disability and/or a significant ongoing illness. The Institute has a <u>Disability Service</u> which provides advice and support to students with disabilities. Support available to students with disabilities includes:

- Needs assessment on entry to determine any additional learning requirements.
- Assistive technology training and support.
- Academic support.
- Pre-placement planning and support.
- Liaison with your assessors/lecturers to help arrange accessible programme materials.
- Extended library loans.

Students with a disability are encouraged to register with the <u>MIE Disability Service</u> to seek support where the disability could affect their ability to participate fully in all aspects of the course. To avail of supports from the Disability Service you must upload evidence of your disability. Reasonable Accommodations will be put in place only after a student has fully registered with the Disability Service. If you have any queries regarding any of the Student Support services, please be sure to contact our Access Officer, Simon Yeates, at <u>access@mie.ie</u>, or telephone: 01 805 7752.

Chaplaincy

MIE Chaplaincy Service has a full time Chaplain who works in close co-operation with other student support services on the College Campus. It offers pastoral and spiritual support to students and staff of all faiths and none in the MIE community.

The Chaplaincy Service offers support through a number of initiatives including:

- Pastoral care and wellbeing initiatives.
- Spiritual support.
- Regular creative rituals and Liturgies.
- Inter-faith initiatives.
- Bereavement support.
- Outreach projects Social justice and volunteering.
- Pilgrimages and immersion projects.
- Care of the Earth supporting the sustainability vision of MIE.

Our full time Chaplain, Dr Lily Barry, is located in Room 109A and can be contacted at <u>chaplaincy@mie.ie</u>

Dr Marie Whelton may also be contacted especially at times of bereavement at (01) 8535158 or at <u>marie.whelton@mie.ie</u>.

Student Writing

MIE provides support for students developing study skills through the Marino Counselling service. This is complemented by specific writing workshops, which are available to all students based on demand. For further information email <u>writingworkshop@mie.ie.</u>

Careers Advisory Service

The Marino institute of Education Careers Service's aim is to support, guide and empower MIE students to develop the skills, competencies, attitudes, and self-belief to engage successfully with the world of work and to make informed career decisions. The Careers Service works alongside academic staff to encourage students to become confident and competent learners and take charge of their own professional development.

We provide careers information, education, and guidance to students in several ways to enable them to realise their potential and the opportunities available to them as they progress through MIE.

Further details can be found on the MIE Careers Service on the following webpage <u>https://www.mie.ie/en/student_life/student_support_services/careers_service/one_to_on_</u> <u>e_career_advice.html</u>

Trinity College Dublin Clubs and Societies

MIE has an excellent selection of fantastic clubs and societies which are growing each year. Students in MIE are also eligible for membership of clubs and societies within Trinity College. More information about the clubs and societies in TCD are available at <u>https://www.tcd.ie/students/clubs-societies/</u>

MIE Policies

For a review of all MIE academic policies and procedures related to the B.SC.ECE programme and student progression, please consult the following link:

https://www.mie.ie/en/about_us/quality_assurance/policies_and_procedures/academic/

This page has links to many aspects of student life in MIE. It is the place to go to find out about policies on plagiarism and academic integrity, attendance, appeals, placement and so much more.
